Developers' efforts are focused on adding functionality to the software in two areas: application programs and user interfaces. The user interface is the graphical interface for AutoCAD, which is highly customizable. Autodesk Exchange Apps is a repository of thousands of useful applications created by Autodesk customers and partners. AutoCAD's most commonly used features are in the areas of architectural design, civil engineering, mechanical design, and petroleum engineering. In addition, it is one of the widely used software programs for the oil and gas industry. Powerful and well-documented, AutoCAD has an open architecture that allows for the creation of extensions to AutoCAD. Differences from AutoCAD R14 to AutoCAD R2016 In 2013, AutoCAD 2015 received an overhaul from version 12 to version 14. Compared to its pre-R2014 version, AutoCAD 2014 features an entirely new, modular, multi-screen architecture. It does not require users to install a single executable binary; instead, it can now load and run from a separate runtime environment. It is also fully 64-bit compatible. These changes allow the AutoCAD 2014 runtime to now load on newer operating systems, such as Microsoft Windows 7, and systems running Linux or Unix. Also in 2013, new features were added to the software, such as Measure in Detail mode, an image-based working platform, and LiquidFill, an image-based layer-management tool. AutoCAD 2016 received an overhaul from version 15 to version 16. Awards In 2013, AutoCAD was awarded the Red Herring Best Enterprise Software Award for the second year in a row. In 2012, AutoCAD was named to the Gartner Magic Quadrant for enterprise software. In 2010, AutoCAD was named by Forbes to the "Top 20 Most Innovative Software Products". In 2008, AutoCAD was named by Engadget as one of the "10 Best Free Software". In 2007, AutoCAD won the Edutainment Systems Editor's Choice Award, which is given annually by the editors of PC Magazine. In 2006, AutoCAD was awarded the prestigious European Computer Trade Award. In 2005, AutoCAD won the iF Product Design Award in the category "Systems for the construction industry".
